

## NICCOLO' BORGONOVO

I'm a 21 years old Freelance IT Specialist & Front-end Developer from Milan (Italy) currently based in Sydney (Australia). I love everything that has to do with Web design & development, Graphic design, Information Technology, and I feel a true devotion for Online Marketing.

I always try to use the technology to make other people's life easier, both with software and hardware. During my free time, when I'm not hanging out with my friends or my girlfriend, you can find me working on new technologies and designing futuristic devices.

I have 5 years of experience working as a freelance and working on an studio, and I'm ready for new experiences & challenges! I love working with people, specially if they have the same passion I have for what they do.

Why don't we work together? Go futher down to see why I am the man you need to hire!

Working as freelance to improve the design and usability of this online-only business.

## WEB CMS SPECIALIZATION

My experiences with Magento ranges from the implementation of a multi-website platform, to the integration with POS and scripting personalisation of themes and functionalities. With over 3 years of experience in Magento I can provide you unique platforms that will not only match your expectation but will even go further.

WordPress is one of my favourites CMS, flexibility and user-friendly interface are two of the characteristics that I prefer. With WordPress I crafted blogs, company websites, social networking platforms & eCommerce, basically any kind of website. With 5 years of experience working in WordPress I'm able to realise any request and create websites focused on your project.

I've been working with Kirby in different occasions, integrating pre-existing corporate blog on new static websites or creating a new personal blogging platform from scratch. Kirby allow to keep your platform simple thanks to his "file-oriented" structure and the absence of a database.

I've been using the CMS Joomla on restyling projects and platform maintenance. Like most of the other CMS Joomla use a PHP base, so is not difficult for me to analyse and recode the system following your requests.

Shopify is a simple eCommerce oriented CMS, in my experiences as freelance I've been working with Shopify in different occasions, developing templates and optimising the platform for SEO and speed.

## HOBBIES & INTERESTS
